A Brief History of a Growing Family Business

In 2007, a small company called The Shower Seal Shop Ltd was born. It started with little more than £100 and an idea that would help customers across the UK solve a very common problem. As the very first supplier of replacement shower seals, the company quickly grew, enabling re-investment for new ideas and products.

Our early company ethos was to tackle common problems experienced by customers in the bathroom and plumbing industry.

After launching many pioneering products such as The Uniblade – the only shower seal to fit any glass thickness straight or curved. The Uniwheel – the world's first universal shower door runner. The Chameleon wet room solution seal and many others, it was clear that our ideas were very well received by you, the retailers.

Your amazing response has encouraged us to keep designing, producing and evolving. In 2015 we launched Inventive Creations Ltd. With our sister company, we are rapidly moving forward with even more exciting new products and ideas. Our Tap cartridge range and Splinefinder have taken the country by storm and there are plenty more product ideas in the pipeline…

Within these pages you will find product ranges for both The Shower Seal Shop Ltd and Inventive Creations Ltd. We hope you will find it a useful tool to compliment your business and customer service.

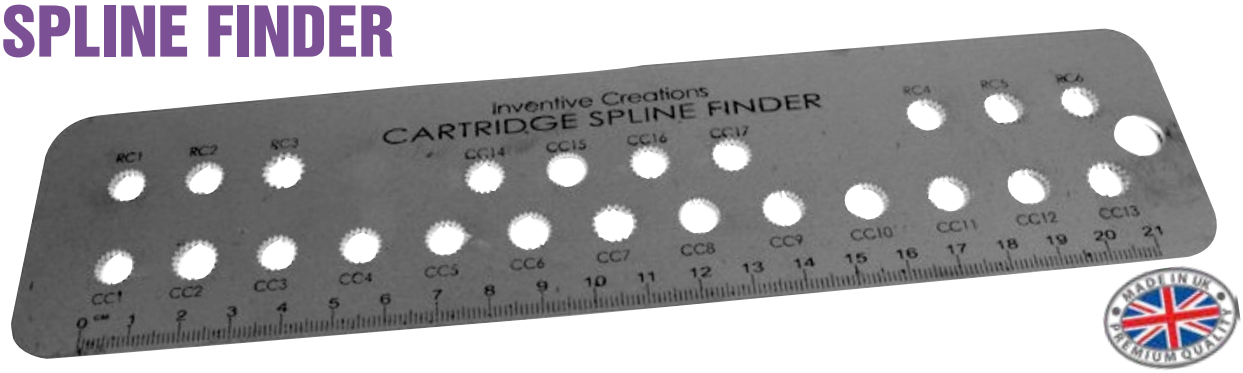
All supplied in a handy carry case at no extra cost!

SPLINE FINDER



The Spline finder is another innovative idea from Inventive Creations Ltd. It is a must for anyone that stocks and sells our range of tap cartridges. It is a simple tool for you, the retailer, to identify and match your customer's old faulty tap cartridges to one of the many cartridges from our range.

Simply place your customer's old tap cartridge spline - (the spline is the top of the cartridge that the tap head slots onto) - into the different holes in the Spline finder. Each hole in the Spline finder has a tap cartridge code printed next to it. This will help you find which tap cartridge from our range will fit in that situation. A simple but extremely effective selling tool for your convenience.

MONO HEADS

Our brand new range of complimentary Mono Tap Heads will freshen up old worn out mono basin mixers. These heads are sold to suit our own range of Mono Cartridges. Each size head will fit any of our same sized Mono Cartridges on page 24. This allows your customer to not only change the inside of the tap - but freshen up the handle too.

UNI PRODUCT RANGE

unitrap®
WATERLESS WASTE

Our latest design is much improved on existing models on the market with the ability to fit bath, shower, basin & bidet waste threads. It also adapts from 32mm to 40mm waste pipe with a simple compression fitting. You can use the trap inline or angled and the rubber membrane prevents unwanted smells or backflow. All in one pack at an unbeatable price.
All in all the ultimate waterless trap!

- Fits onto baths, showers, basins and bidets
- Extremely compact - only 73mm deep
- Length from centre of waste 135mm
- Removable bush to adapt to 1 ½ thread
- Adapt from 40mm to 32mm waste pipe
- Rubber membrane allows flow, prevents smell and backflow
- Can also be used inline if required
